Location: Eugenio Garza Sada #1070 Oficina PB001 Col. Cumbres del. Campestre C.P. 37128, Leon Guanajuato, MEXICO.  
Phone number: 52-01-477-688-5154

## Sales office / Branch

CDMX (Sales Office), León, GTO. (Branch).

## Identity

The founder of our company saw oil leaking from a car and thought that if only such leak could be prevented, resources can be saved, thus greatly contributing to the recovery of Japanese economy.

The result was the development of our company's first product, a liquid gasket called "ThreeBond No. 1."

Since then, we have contributed to technological innovation in the industrial world for over 60 years.

ThreeBond

**The "Three" of "ThreeBond" refers to three principles.**

**To manifest love through our work.**

**To serve humanity and society through our work.**

**To strive for spiritual growth and development through our work.**

# Products

## Automotive Market

- Liquid gaskets
- Silicone-based liquid gaskets and potting agents
- Anaerobic high-strength sealants
- Agents to prevent screws from loosening, leaking, and rusting
- Instant adhesives
- Rust-inhibitors and lubricants
- Sealock processes
- Precoat process for bolts / MEC
- Industrial parts cleaners
- UV-curable resins
- Structural adhesives/high-peeling strength, impact-resistant, two-component elastic adhesives

### Engines

### Cases and oil pans

### Motors

### Inverters and converters

### Secondary batteries

## Electronics Market

- UV-curable resins
- Electroconductive resins
- Functional sheets
- Battery sealants
- Heat-dissipating agents
- Electrical-use silicone adhesives
- Epoxy-resin compounds
- Anaerobic high-strength sealants
- Single component, moisture-curable elastic adhesives
- Instant adhesives

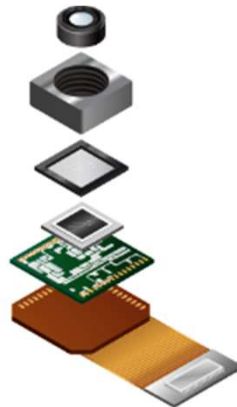

### Smartphones

Fingerprint sensors

Touch panel modules

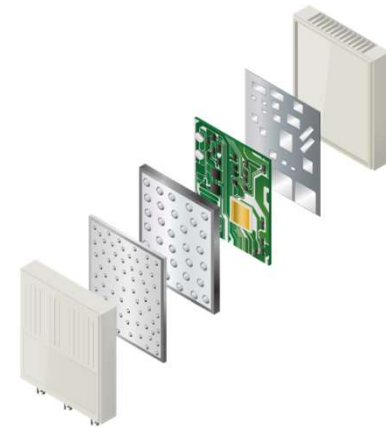

### Camera modules

### Motors

### Base stations

## Public Industrial Material Market

- Sealants for general pipes, water supply pipes, and gas pipes
- Agents to prevent screws from loosening, leaking, and rusting
- Instant adhesives
- Rust-inhibitors and lubricants
- Epoxy-resin compounds
- Precoat process for bolts / MEC
- Industrial parts cleaners
- Silicone-based sealant for construction
- Industrial adhesives
- Single-component, moisture-curable elastic adhesives
- Molybdenum, sticking-prevention lubricants
- Single-component, epoxy-resin compounds
- Contact-point rejuvenators
- Dilution solvents
- Tapes
- Industrial cleaners
- Sealock processes
- Sheet-type gaskets

### Medical

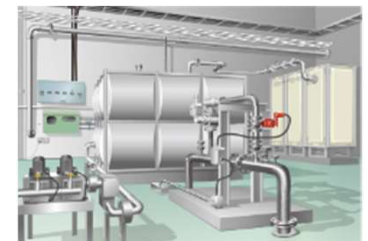

Disposable products,  
Inspection equipment

### Railways

Body,  
Under floors,  
Seats,  
Maintenance

### Factory

## Auto Aftermarket

- Chassis coating agents ■ Cleaners for brakes and parts ■ Glass-type body coatings
- Rust-inhibitors and lubricants ■ Liquid gaskets
- Silicone-based liquid gaskets and potting agents
- Water-repellent coating for window panes ■ Anti-corrosion agents for the car body
- Brake maintenance kits ■ Additives ■ Tire coatings ■ Wheel coatings ■ Seat cleaners
- Wax for car interiors ■ Deodorants ■ Blowout repair agents ■ Car shampoos

### Car (exterior)

Body, Glass, Undercarriage  
Tires, Wheel

### Car (interior)

Panels, Air conditioners,  
Seats, Interior space

### Car (engine)

Engine, Batteries,  
Radiators, Fuel system

Col. Independencia Municipality of Tultitlan, State of Mexico

# Making challenges into chances

**As industrial technology advances, unthinkable new losses and problems come to occur. We interpret such losses as challenging opportunities and will continue to lead in making opportunities for new social contributions for a better future while responding to our customers' needs.**
